Objective

Curious and driven Computer Science student with a strong interest in learning and adapting to new technologies. Focused on building practical, reliable, and efficient solutions while continuously improving technical and collaborative skills. Seeking opportunities that foster professional growth, innovation, and meaningful contributions to organizational goals.

Skills

Languages: Python, Java, C, JavaScript, SQL, HTML, CSS
Frameworks & Runtimes: Node.js, Express.js, Flask, Bootstrap
Databases: MongoDB, SQL, MySQL
Concepts: SDLC, OOPS, DSA, Agile Methodologies
Tools & Technologies: Git, GitHub, Docker, Linux, RESTful APIs, Cloud (GCP), VS Code

Education

Bachelor of Technology in Computer Science and Engineering	CGPA: 6.5
Amal Jyothi College of Engineering (Autonomous)	2022 – 2026
Senior Secondary (CBSE)	Percentage: 75%
St Antony’s Public School, Anakkal, Kanjirappally	2020 – 2022
Secondary (CBSE)	Percentage: 89%
St Antony’s Public School, Anakkal, Kanjirappally	2020

Projects

Invigilens: A Smart, Real-Time Malpractice Detection and Monitoring System

Tech Stack: Python, YOLOv8, MediaPipe, OpenCV, FaceNet

- Developing a real-time computer vision system to detect and flag exam malpractice using YOLOv8-Pose fine-tuned on custom datasets.
- Integrating MediaPipe 3D Head Pose and temporal thresholds to detect gaze deviation and suspicious movements.
- Implementing FaceNet-based facial verification for automated attendance and impersonation detection.
- Designing a multi-camera monitoring system that provides real-time alerts and generates incident logs for post-exam audits.

Modernized Printing Solutions

Tech Stack: Flask, MongoDB, HTML/CSS, JavaScript

- Built a full-stack print service platform using Flask and MongoDB that lets customers upload documents, track orders in real time, and manage print requests through an intuitive interface. Shopkeepers can access and process these orders directly, ensuring smooth coordination and faster turnaround.

GitHub: Modernized Printing Solutions

LumoVale – Full-Stack ECommerce Platform

Tech Stack: Node.js, Express.js, MongoDB (Mongoose), Handlebars (HBS), Razorpay

- Developed a secure MERN-based e-commerce site with authentication, shopping cart, Razorpay payments, responsive UI, and an admin dashboard for product, order, and image management.
- Focused on modular backend structure, optimized performance, and real-time order management.

GitHub: LumoVale

Certifications

The Basics of Google Cloud Compute Skill Badge	<i>Issued Oct 2024</i>
Full Stack Developer Bootcamp – Master Frontend to Backend, Geeks for Geeks	<i>Issued June 2025</i>

Leadership Roles

Vice Chair – ACM AJCE Student Chapter	July 2024 – Present
Event Coordinator – ACM AJCE Student Chapter	May 2024 – June 2025
